

ENVIRONMENTAL POLICY

WILBURY VETERINARY SURGERY recognises that all businesses impact on the environment in a variety of different ways. As such we are committed to the continual improvement of our environmental performance in relation to our services and operations.

We have identified the following key environmental impacts associated with the supply of veterinary care and services to our clients and their pets:

- Consumption of electricity, gas and water
- Use of volatile halogenated anaesthetic gases
- Waste production and disposal
- Paper usage
- Transport of personnel and animals
- Procurement and supplies

The company is committed to reducing these impacts and to the continual improvement of our environmental performance. To help achieve this, Wilbury Veterinary Surgery is working towards Investors in the Environment Silver accreditation.

We are committed to working with our staff, customers, suppliers, investors, contractors, regulatory bodies and neighbours to achieve the following objectives;

- Increase cost-effectiveness by reducing our consumption of energy and raw materials
- Reduce waste and carbon emissions both locally and in the wider environment
- Systematically assess the environmental impact of all aspects of our company
- Set targets for measurable annual improvements
- Make our progress available for independent assessment (iie).

It is the responsibility of all employees, visitors and contractors to fully support this policy through active participation and co-operation.

This environmental policy will be displayed at all times and is openly available to all members of the public via our website - www.wilburyvets.co.uk

The introduction and implementation of this policy is a commitment of Wilbury Veterinary Surgery management and a shared responsibility with our employees. Lucy Hartwell has designated responsibility for day-to-day implementation of this policy.

The policy will be reviewed annually as part of the organisations overall environment management plan.
